

Impressive Services
Mark 15th Anniversary
Signing of Armistice

Citizens Join in Demonstration of
Honor to the Glorious Dead in
Mass Assembly in Commu-
nity Hall.

Coleman's war dead were honored by an impressive Remembrance Day service in the community hall, when wreaths were laid on the memorial tablet, and the address was given by Rev. A. S. Partington, rector of St. Alban's, Rev. Roy C. Taylor, of St. Paul's, reading the prayer and pronouncing the benediction. Major G. Pattinson presided, and "Last Post" and "Reveille" were sounded by Jas. Lowe. Miss May Powell played the accompaniment for the hymns, and Mr. B. Skinner, tenor, sang "The Trumpeter."

At 10 a.m. Legionaries, Boy Scouts, Girl Guides and Brownies marched from the town hall, headed by Legion Citizens Band under Alex. Easton, and the service opened promptly at 10 a.m. with "O Canada" and "Our Help in Ages Past" was sung, following which a Scripture reading and prayer was read by Rev. Roy C. Taylor.

The address of Rev. A. S. Partington was based on the text: "And it shall come to pass, when your children shall say unto you, what mean by this?"

He stated: "The spirit of Remembrance plays a very prominent and decisive part in the history of nations an understanding remembrance of its past and in understanding what remembrance is mould and direct future. So it was with Israel. It was because the race remembered, understood the great experiences of its past, the deliverances, the trials, that the race survived through 3000 years."

The Egyptian, Babylonian, Assyrian, the Roman and the Greek might destroy the cities, overthrow their country, enslave the people, they have passed, and the Jewish remnant. It was because their historians were prophets of remembrance. "Remember, they cried, by the Passover, how God saved us from Egypt; remember the days of old, when you were the race whence you are born." So it is true today. The resurrection of modern Italy, Mussolini's touched the heart that vibrates in every Italian heart. So if we remember past days of great things, how can we be content with present days of small things? We must remember and rise to the dignity of the occasion."

"And it shall come to pass, that your children shall say—Whence mean by this service?" We too stand on the threshold of a great epoch. Fifteen years ago and already a large part of our population is as those who say "What mean ye by this service?" Then Great War to every man is but a vague and material memory. For think of their horror and anguish. Death is thing unknown. So Armistice Day is a meaningless pageant or a common holiday? What mean ye? What are the young men, the sons and the husbands of those who gave their all, so that those who come after might read with unclouded eyes? That those millions of men, most of them young men, full of idealism and enthusiasm, had been asked to believe that there were greater things than physical life, worse things than physical death, that the life of the nation is greater than that of the individual, and greater outside oneself, which is greater than all, which can claim one to die for it.

37-1
CARD OF THANKS

The Catholic Ladies Aid, thank all those who patronized their bazaar, and those who made donations and those who helped make it a success.

They served tea, and Mrs. C. J. Dutil, Mr. Michalsky, Mr. Lylek, Mr. D'Appolonia, Mr. Nicholas, Mr. McDonald, Mr. Kapala, Mr. Burtnik, Mr. T. M. Murphy, and Mr. DeCecco for their kind donations.

A meeting of the aid committee was held on Monday evening, the following being present: G. Pattinson, D. Gillespie, Arthur Graham, J. Dunn, Mrs. Dunn, Mrs. R. M. Dunlop, Miss Yule. It was reported that a general meeting will be called

Rev. and Mrs. A. S. Partington motored to Calgary, Tuesday, where a clergy conference is being held.

The mission which is to be held from November 27 to December 1.

Rev. Canon G. E. Gale, rector of St. Alban's Church, Calgary, will conduct services in Coleman, December 1.

BOWLING LEAGUE ORGANIZED
TEN TEAMS PLAYING

Bowling has taken a popular hold and keen competition is looked for among the following teams: Grand Union hotel, Trundlers, Grand Union Hotel, Grand Union Hotel, Belgian Big Store, Hotel Club, Dutch team, League team, Palm Confectionery, League game commenced on Tuesday evening with the Trundlers.

Chiselling

The N.R.A. campaign in the United States, if it has not added a new word to the vocabulary of the American people, has at least given a popular and significant meaning to an old word, and has brought that word into every day conversation. It is being used by everybody from President Roosevelt to the man on the street corner. The word is "Chiseling," "Chiselled," "Chiselling." It has become an accepted slang phrase, and like so many slang words and phrases it is very appropriate for the use to which it is being put.

In its usually accepted meaning, "Chiseling" is the name of an instrument of iron or steel used in carpentry, joinery, cabinet work, masonry, sculpture, etc., for paring, hewing, or gouging. In its slang adaptation it is applied to mean "to cut close," as in a bargain; to cheat.

Thus, under the now almost universal N.R.A. codes in the United States providing for shortening hours of labor, increasing wages, controlling sales prices, regulating production, the word is being applied to the individual or the concern which by one devious means or another seeks to pare off a little here or there from the spirit of the agreement into which they have entered, or to gouge a little out of their workers or their customers. Such individuals or concerns are known as "Chisellers," and the tactics employed by them as "chiselling." They are apt and expressive words when so used.

One is inclined to extend the application of these terms beyond the N.R.A. in the United States, and apply them generally to the attitude of many people in all lands and of all classes and conditions to life itself, its manifold duties and responsibilities.

There is the boy and girl in school whose education is being provided for them possibly at great expense and very real sacrifices by their parents but who, instead of applying themselves diligently to their studies for the few brief years of school training, are just "chiselling" their way through, devoting only sufficient time and thought to their work to "get by" but not really and earnestly striving to make the most of their opportunities. They are responsible for waste of time, waste of money, and of personal sacrifice by their parents, waste of their time and opportunities, waste of their lives which, to their lasting regret in later years, they can never replace.

There is the teacher who, instead of giving all their very best to their pupils and taking a keen interest in their advancement, is content to just "get by" their inspector and retain their positions by having a sufficiently satisfactory number of "passes" by their pupils irrespective of the fact as to whether or not real instruction has been given to them.

There are the "clock watching" employees, clerks, stenographers, workers in all trades, laborers in every field, who, instead of striving to give a maximum of efficient service in return for the wages paid to them, are time-servers, doing just as little as they can, gouging their employers of time and effort which rightfully belongs to them. On the other hand, there is the employee who in one way or another gouges his most faithful employer.

There is the contractor and the manufacturer who gouges the public by using shoddy instead of pure materials, who pares off a portion of the rightful amount of material that ought to go into the production of an article. In the construction of a building, and who is not above slipping one or two imperfect articles into a shipment of goods, or using some defective material in a building where it is buried away from sight. They are chisellers, and are indifferent to the fact that their chiselling may result in disaster, great loss and suffering to others.

There is the debtor and the manufacturer who gouges the public by adding in an endeavor to escape payment of his just debts, and the creditor on the other hand who takes advantage of the difficulties of his debtors to despoil them for all they have regardless of the fact that those difficulties may be beyond the debtor's control and which to the best of his ability he is striving to overcome. Both classes are chiselers.

There is that large group who have a perverted twist or kink in their characters which induces the belief that it is all right to try and get the best of governments—persons who will smuggle, persons who "chisel" with great ingenuity when filling out an Income Tax form, persons who surreptitiously use their radios or motor cars without a license, and so forth and so on.

Then there are numerous people who "chisel" in the discharge of their general obligations as citizens. Men and women, for example, who are too indifferent to even take the trouble to cast a ballot; who defraud all persons in public office who are endeavoring to serve the public welfare; who characterize politics as dirty and corrupt and who stand aloof therefrom instead of discharging their own duty and actively assisting to raise the standard of public life.

Possibly each and every one of us is a chiseler in one way or another. And it might not be a bad idea for all of us to take stock of our own attitude towards many things and thus seek to discover just wherein we are chiselers.

Then there is the other phase of chiselling. The sculptor who takes an unthorn block of wood, stone or marble and chisels away until there emerges a thing of beauty. Such a one is typical of many men and women who are devoting their lives to chiselling away the sordidness, the ugliness, the evil of life. They are engaged in removing the grime that may have accumulated and buried that which is beautiful and good.

The vital question is: What kind of a chiseler are you?

Developing New Industry

The latest Manitoba industry to be developed is the Manitoba low bush cranberry. Hitherto cranberries have been imported into the province. The type that grows in Northern Manitoba is known as the "low bush" cranberry, which the early winter frost seems to sweeten so that frozen berries can be thawed with full flavor retained. The berries are coming to Winnipeg in 1,000 pound lots.

Radcliffe, England, with 25,000 population, boasts it has no slums.

Smothering Sensations
Faint and Dizzy Spells

These feelings of faintness; those dizzy spells; those all-gone smothering, sinking sensations which come over people from time to time, are warnings that should not go unheeded. They are symptoms of an extremely weakened condition of the nerves and other vital organs, and should be given immediate attention.

The best known remedy is Milburn's H. & N. Pills a remedy with which to recuperate their health, build up their run down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. & N. Pills.

Testing Penny Flipping Odds

Professor Hopes To Prove Heads And Tails Are About Even

Penny flipping odds are about even on heads and tails after 40,000 scientific flips. That's what Professor Pope R. Hill, of the mathematics department of the University of Georgia, has found. Months ago Professor Hill began his flipping. He assembled 200 pennies, a hundred of one date, and the same of another. He balanced each penny against the other down to one-thousandth of a gram. He expects to flip the pennies for the 100th time next July and then his experiment will be complete.

LETTER FROM A MAN OF 90

About His Rheumatism

He asks us to excuse his writing. We do. He is 90 years old and is still using his hands to write at all his age, especially as he has been suffering from rheumatism. This is what he says in his letter:

"The first time I had rheumatism, I was 90 years old. I lay in bed for six weeks with inflammatory rheumatism. Since that time I have been taking Kruschen Salts, and have not had any trouble since. I take Kruschen Salts every morning before breakfast, and still continue to do so, because I am sure they have been of great shape for three years. Excuse this writing, as I am ninety years old and use both hands to write."—J.R.G.

Kruschen Salts are the best away they get. Dissolved crystals of salt will cure all kinds of rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Take two of these "dissolved daily dose," excess uric acid will never form again.

Prefer Living On Mainland

Families On Bardsey Island Find It Too Lonesome

Bardsey Island, off the coast of Wales, is becoming too lonesome for Thomas Jones and Griffith Griffiths and their families, the only inhabitants. Both men have offered their farms for rent and are leaving to take up farming on the mainland. Griffiths also is postmaster and grocer on the island. If tenants are not found, Bardsey will be deserted. Seven years ago all the inhabitants with their "kids" evacuated, but eventually it was re-inhabited.

An old woman underwent an operation. When consciousness returned she was asked how she had felt under chloroform.

Fine Remedy For Acid Stomach

Four out of five people have acid stomach whether they know it or not. Pain after eating, belching, gas, and all the all signs of too much acid. A special Bittered Magnesia meal after meals will overcome this condition within three minutes. Any druggist will tell you that. Try it and see.

Some Sailors Privileged

Those Who Play Football Are Kept In Port

Football has become popular among sailors and their wives—at Chatham, England, since it has been rumored that seafaring men who play the game are privileged to stay in port while others who are good only on naval occasions are sent to sea out of their turn. The gridiron stars are for all sailors, who know that husbands at home are safe from girls at other ports, are urging their marital mates to get on a team without delay.

Placed On Retired List

"Tally-Ho V.C." Given Honorary Rank Of Brigadier

Known as the "Tally-Ho V.C." and stated to have been the first British soldier to enter an enemy trench in the Great War near Mons, Col. John Vaughan Campbell, V.C., has been placed on the retired list under the age limit and granted the honorary rank of brigadier. Col. Campbell earned the soubriquet because he rallied his men under enemy machine-guns fire by blowing a hunting horn and giving the traditional hunting-cry.

Credit To His Training

A citizen of Cody, Wyoming, lost a \$10,000 bill while shopping. His search for it was fruitless, but when he went to feed his dog next morning, the animal was carefully guarding the missing bill. The dog had been trained to pick up anything his master dropped. Appropriately enough the dog was a Chesapeake Bay retriever.

Child welfare is credited with saving 100,000 babies in England in the last year.

"It was beautiful—just splendid. I thought I was in heaven—till I saw the doctor."

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

Wives get tired during these hard times. They are the ones who must bear the load. When the husband comes home with less money in his pay envelope, she is the one who must stand by him and help him out.

If you are tired, worn out, nervous, try Lydia E. Pinkham's Vegetable Compound.

The plural of gladiolus is gladiol and not gladiolus, as given in a British dictionary, says an American horticultural expert. That's all right with us.

Leaving Pacific For Summer

U.S. Fleet Is Ordered To Concentrate In Atlantic

The United States fleet will be concentrated in the Atlantic next spring for the first time in almost four years.

President Roosevelt authorized the first line of defence to start steaming from the Pacific to the east coast after the winter months. It will return to the Pacific in the fall.

The fleet, comprising the battle and scouting forces—the latter formerly known as the Atlantic fleet—have been stationed in the Pacific since the spring of 1932.

During the past 18 months the navy has explained that the scouting force was kept in the Pacific for reasons of operating economy. The situation in the far east was understood, however, to have played a considerable part in the retention of the full fleet in the Pacific.

The reason given for the order to return was explained by Henry L. Roosevelt, assistant secretary of the navy, as a return to the fleet's normal operating policy.

Russia Must Recognize Fair Business Practice

Hon. H. H. Stevens Raps Trade Methods Of Soviets

Russia must come again to "a recognition of fair business practice" before the nations of the world can do business on a normal basis with it, in the opinion of Hon. H. H. Stevens, Minister of Trade and Commerce.

Russia, he said, had followed a practice of disposing of goods at "any price, cost or value" which could be obtained. Thus Russia abandoned, for instance, the "fall cause" in her contracts whereby Soviet agents were empowered to sell below the price asked by any other nation, world countries could hardly be expected to trade with her normally. Relations with Russia had been "dislocated" by such trading practices as these.

Mr. Stevens was guest speaker at the first dinner gathering of the junior board of trade of the city of Ottawa which came into being not long ago.

Hard To Replace

People Always Find Something Stable About Old Friends

Old friends are so hard to replace. We meet new ones all the time, but the new ideas are not the real ideas of years ago. There is something stable about old friends. You know them and when you know someone for twenty-five or thirty years and meet them all the time, it is a different kind of a hello than the new friend gives you, the hello from an old friend means so much more. You look into each other's eyes, and see each weathering the storm of life—who is gray, who is getting bald, who has grown the fatter, and when you both meet and one says you look the same as you did twenty-five years ago and the same compliment is returned makes the hello so different.

Mr. Stevens was guest speaker at the first dinner gathering of the junior board of trade of the city of Ottawa which came into being not long ago.

Central Bank For Canada Recommended In Report Of Royal Commission

Ottawa, Ont.—With the two Canadian banking-members dissenting, the majority of the royal commission of five appointed to investigate Canada's banking and currency system, recommends that a central bank for Canada be "forthwith established."

Since all parties in the House of Commons are apparently committed to the setting up of such an institution, it is likely this will be one of parliament's first actions when it assembles in January. Nothing in the report would indicate that the central bank would have any direct power to render credits more accessible to agriculture, but a special chapter deals with this problem.

The commission suggests a Dominion-provincial investigation to devise some organization for the extension of intermediate and short-term agricultural credit.

Several recommendations for minor changes to general banking practice are made but in the main the commission found little fault with the existing system, except in the lack of a central bank.

The proposal is the establishment of a central bank structure of which the governor, deputy governor, and director would, in the first instance, be appointed by the Governor-in-Council. It would have a capital of \$5,000,000 open to subscription by all British subjects resident in Canada and all excess profit would revert to the government.

The report recommends that the central bank should have the sole right of note issue. The commercial banks' issue should be redeemed over a specified period of years.

Deal With Mosquito Pest

Death Ray Idea Is Being Tried Out In Trinidad

Port of Spain, Trinidad—Merits of a "mosquito death ray" installed at the French penal colony on Devil's Island, are under investigation by health authorities here with a view to its possible adoption in Trinidad's prisons.

The ray, developed by a Parisienne, Mme. Germaine Gourdon, kills mosquitoes by electrical waves, and remarkable results are claimed on its behalf.

Japs Study Abroad

Montreal, Que.—Although Japan is forging ahead as an industrial nation, she still sends her representatives abroad to study the most modern methods of English-speaking countries, according to Mikisaburo Sakurai, chief engineer of the Japan Gasoline Company at Tokyo.

Wider Scope For Unemployment Insurance In Great Britain

London, Eng.—Sixteen million persons will be covered by Britain's gigantic new unemployment insurance scheme. The measure for revising and co-ordinating previous plans with important additions was formally introduced in the House of Commons by Sir Henry E. Betterton, Minister of Labor.

The Labor party executive decided to present a motion of censure on the government on account of its disarmament policy. The government, taking note of this, also scrutinized the result in the Skipton, Yorkshire, by-election, where the Conservatives held the seat but with a greatly reduced majority.

Labor is an overwhelmingly minority in the House of Commons and there is no chance of its censure motion getting acceptance, but the result of the Skipton by-election was cheering to the Labor ranks. The Conservative candidate was elected with 18,136 votes out of a total of 42,216 for four candidates. In the general elections the Conservative had 28,013 out of 41,066, in a straight fight.

The government's vast new unemployment insurance bill, the most widely-embracing of all social services introduced at Westminster, aids 4,000,000 persons to those workers who are now in the scope of its provisions. Copies of the bill will be distributed, but the main discussion will be deferred to the new session opening November 22.

Asks New Law For Italy

Mussolini Requests Chamber Of Deputies To Allow Industrial Control

Rome, Italy—Premier Mussolini has asked the Chamber of Deputies to approve a decree whereby the government may guarantee and participate in stock issues of private companies and guarantee the principal and payment of dividends to stockholders.

The proposed law would transform the whole industrial capitalizing system of Italy, and is intended to guarantee dividends to stockholders regardless of the companies' conditions.

If the company is profitable, additional dividends will be added.

The government will operate through the industrial reconstruction institute.

The institute's first step is to guarantee 400,000,000 lire (\$32,000,000) issue of bonds for the new Piedmont Telephone Company.

Financial circles said that owing to the public's traditional preference for government securities, this may result in government financing of all industry.

Canadian May Get Contract

Large Number Of Grain Elevators To Be Constructed In Argentina

Port Arthur, Ontario—Contracts, which will involve an expenditure of more than \$30,000,000, for the construction of a large number of grain elevators in Argentina may be granted.

G. H. Howe, head of a local elevator construction company, has been in the South America republic for some weeks, touring the districts in which the elevators are to be erected. In a telegram received from him, he expressed confidence in securing the contracts.

Mussolini May Call Meeting

Discussion Of Disarmament Stalemate Is A Possibility

Rome, Italy.—The possibility that Premier Mussolini will call a meeting of four European powers and the United States to consider the disarmament stalemate was seen by well informed circles here after H. D. Duke and Hermann William Goering, German minister without portfolio, had an hour conference.

The conversation on disarmament was said to have revolved around the method to be pursued to re-open the arms parity, broken off shortly after Germany withdrew from Geneva.

Roosevelt Announces Larger Relief Program

Expects To Give Work To Four Million Men

Washington—President Roosevelt has announced an expansion of the federal relief program aimed at taking 4,000,000 men off public relief rolls.

The plan involves the creation of a civil works administration and the use of \$100,000,000 of public works funds.

Through these additional funds the administration intends to increase the part time work of men now on relief rolls so that they may be put on a self-sustaining basis.

It is intended 2,000,000 men shall be put on a self-sustaining basis by Nov. 26 and that an additional 2,000,000 men may be put on this basis by Dec. 15.

Approximately 3,000,000 families are now being cared for by public relief agencies, a reduction since April of 1,500,000 families.

Other recovery signs noted at the White House were:

A rise in farm prices for the week ending Oct. 25 from an index figure of 50 to 52.

A rise in prices paid by farmers of less than one cent.

A decrease in retail food prices of one cent.

An average rise of less than one per cent. in commodity wholesale prices.

World Tariff Truce

Britain Considers Pact Not Longer Of Any Value

London, Eng.—In view of the decisions from the world tariff truce negotiated in London last June the British government considers the pact is no longer of any practical value, and consequently the United Kingdom will withdraw it from December 7.

The House of Commons, crowded as it was re-assembled, cheered this statement by Walter Runciman, president of the Board of Trade.

With the exception of Japan and some other nations practically all the 66 nations represented at the conference adhered to the true negotiated in the early and optimistic stages of the great London parley.

Since the abortive adjournment, if not conclusion, of the London conference, however, the true has gradually come into disfavor. Mr. Runciman pointed out Holland, the Irish Free State, Sweden and Switzerland had given notices of withdrawal while France and Denmark had made substantial reservations.

Anniversary For Winnipeg

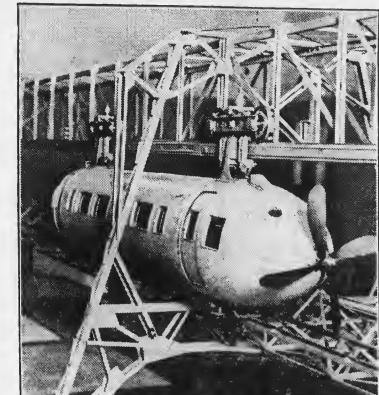

Winnipeg, Man.—Sixty years ago Nov. 7, Winnipeg, a little trading post at the junction of the Red and Assiniboine Rivers, was divided into four wards and started on her way as a full-fledged city.

No ceremony marked the anniversary but attempts will be made to arrange some celebration for mid-summer.

More Work Necessary

London, Eng.—Declaration that a regular trans-Atlantic aerial service between Britain and Canada cannot be built until a "good deal more" experimental flying is done and suitable air bases established, is made by the aeronautical correspondent of the Morning Post.

MAY TRANSPORT SOME OF LONDON'S TEEMING POPULATION

Above is a working model of the new system of transport known as the "Biplane," which has been submitted to the London (England) County Council by Mr. Charles Boot, a Sheffield builder. Mr. Boot's scheme, if adopted, would involve the building of two satellite towns in Essex, linked by a railway aerial railway to London. The railplane consists of streamlined cars slung from bogies which travel on a single overhead rail. The cars are propelled by air screws fore and aft, are driven by electric motors or oil engines and their chief advantages are cheapness in construction and operation. The railplane is designed to work at speeds up to 120 miles an hour.

W. N. U. 2020

LIPTON'S SUCCESSOR

Believes Trade Revival Will Need To Be World-Wide In Extent

Britain Will Make Second "Token" Payment

Announcement Made In House By Chancellor Of Exchequer

London, Eng.—The British government will make another "token" payment when the next instalment of the war debt to the United States falls due December 15, paying \$7,500,000 in lieu of the \$17,000,000 instalment.

Neville Chamberlain, Chancellor of the Exchequer, made this announcement shortly after the House of Commons reopened, simultaneously with a similar statement in Washington by President Roosevelt.

The payment will be made in United States currency so with the pound above par in the United States the British government will effect a small saving.

It was made clear the United States does not regard Great Britain as defaulting on her war debt in stemming as France and some other nations have done. President Roosevelt was sympathetic on this point in announcing acceptance of the "token" payment.

"It has unfortunately," said Mr. Chamberlain, "not proved possible to reach an agreement for a final settlement.

"His majesty's government have stated they are ready to resume negotiations on the general question whenever after consultation with the president it may appear this can usefully be done."

Thirty 'Planes Leave France For Africa

Air Armada Will Make Fifteen Thousand-Mile Trip

Istres, France.—A great French air armada of 30 planes manned by 60 picked aviators started a mass flight to Africa on November 8. The first squadron of 15 machines took off in triads.

The start of the so-called "black ermine" was marked by a balcony motor throwing one plane tardily out of step in the sky as part of the remainder took off.

On the 15,525-mile flight from the airport near Marseilles, dangers of desert and jungle will be braved for the sake of France's military, political, technical and commercial prestige.

May Have New Airport

Project For Winnipeg Would Give Employment To Many

Winnipeg, Man.—Plans for a new airport for Winnipeg, entailing construction of a huge artificial lake, two miles in diameter, within seven miles of the heart of the city, were announced by L. W. Hicks, chairman of a joint committee of representatives of the Winnipeg board of trade and the aviation league. The lake would have facilities of landing either land or seaplanes of any size.

The project, the committee hopes, will be built as an unemployment relief plan by the co-operative efforts of the Dominion, Manitoba and civic governments.

Ramsay MacDonald Regrets Germany's Action In Quitting The League

London, England—Prime Minister Ramsay MacDonald declared Germany's notice that she would quit the League of Nations "almost amounts to the repudiation of the peace machinery of the world."

Mr. MacDonald said some terms of the peace treaty and much that had occurred since then "undoubtedly" if not irritating grievances in Germany, "but the policy she has adopted to express and remedy these grievances have only increased the difficulties in meeting these cases."

"Her motive," he declared, "I do not question. We have always believed the best policy was to help Germany get out of the conditions she resents. The British government is most anxious to continue that policy if Germany will allow her to do so. Convince nations that the risk they run in disarmament is little, then the amount of disarmament will be great."

"Failure to understand this," he continued, "has been Germany's fundamental mistake. All these delays make us heart-sick, and the patient of Job seems necessary."

Toronto, Ont.—Chances of any single country in the world—even the United States—bringing about a revival of trade through purely domestic efforts and without a revival in the world market are "strictly limited," J. A. McLennan, president of the Canadian Bankers' Association, declared in his farewell presidential address to the association.

"It is still true that there are still some who believe that a country, by pursuing appropriate domestic policies, can escape from the consequences of a drastically diminished world market," he said. "This conviction has found expression in recent months among our neighbors in the United States, and there has been a determined, in part successful, effort to raise the domestic level of commodity prices there."

"I think, however—and recent events appear to confirm this view—that even in a large and important a land as the United States the possibility of reaching such an objective by purely national policies, and without a revival of the world market, are very strictly limited."

"It is becoming daily more evident that the supreme test of these policies is approaching, and that the fortunes of not of the United States only but of several other countries will depend on the outcome of this test."

The annual meeting elected J. A. Dods, joint general manager of the Bank of Montreal, to succeed Mr. McLennan as president. General managers of the Canadian Bank of Commerce, Royal Bank of Canada, Bank of Toronto, and Dominion—S. H. Logan, M. W. Wilson, H. B. Henwood and Dudley Dawson—were named vice-presidents.

Since the depression set in in 1929, Mr. McLennan said, three-eighths of the world's trade has disappeared. He said this figure was based on trade statistics of the 15 countries which at the height of prosperity did 75 per cent. of trading.

Livestock For Winter Fair

Several Caravans Will Go From Alberta To Toronto

Edmonton, Alberta—About ten caravans of Alberta's best livestock will go to Toronto for the Royal Winter Fair opening Nov. 21. The stock has now been finally selected under government supervision and comprises three cars of market steers, one of which is from the university farm, three cars of Holsteins, a number of Ayrshires, 16 head of purebred Shorthorns, 13 head of purebred Herefords, four purebred Angus, one car of horses, and one car of sheep.

The animals have been picked from herds in various parts of the province and are declared to be a particularly fine lot, with good prospects of winning some of the male prizes as in previous years.

Princess Has Operation

London, Eng.—The Princess Royal, Countess of Harewood, underwent an operation for the removal of her appendix at her Mayfair home. The King's surgeon, Sir Stanley Hewett, operated. The Princess Royal had been suffering from a severe nervous breakdown.

NOTES AND COMMENTS

N.R.A. will not tolerate any industry which will not pay a living wage. Its objective is to eliminate sweat-shop labor. Under the N.R.A. purchasing power has increased 11 per cent. states Frances Perkins, secretary of labor for the United States. Seeking for price bargains has led to sweat-shop methods. The public have taken a hand at it, helping to develop a system under which they now complain and will they seek for cut prices, merchants as well as the buying public.

We hear lots of talk of the "Brotherhood of man and the Fatherhood of God." From an ideal viewpoint it is fine; from a practical viewpoint it is just "hokey." It is at variance with the natural law, which every day is exemplified in the survival of the fittest, mentally and physically. Ideals are splendid. They attune our attitude to higher things. They lift us above materialism. But we are rudely brought down to earth by the practical, mundane things in everyday life. The ministers of the gospel endeavor to point out to us the way of the Cross, but the world in general fights its own battles in its own way, from nations down to the humblest individuals. Can the fundamentals of human nature be changed to bring about Utopia on earth? Can peace be secured throughout the world? Our only answer is, not till human nature is changed, and that is a remote possibility.

Hitler has gained control of the German people by sheer force of his conviction that he has been chosen to pull Germany from the slough of inferiority into which it was cast by the Treaty of Versailles. We believe Germany started the war. Hitler says the present generation is not to blame; therefore it should not be saddled with the sins of the fathers unto the third and fourth generations. Holy scripture decrees that it shall be so. Hitler says it shall not, and so we have a clash of worldly opinion which would take a modern Isaiah to forecast what the result will be. How can the tide against war be stemmed? If the advocates of force to rule the world are stronger than those who believe that the pen is mightier than the sword, then war there must be. It depends on which side can exert the most influence, or leadership. The church's teaching of "Peace on earth, goodwill towards men" is not sufficiently embedded in the hearts of men to outlaw war among nations.

"Human interest stories are most desired," writes a newspaper editor of a big daily newspaper. Stories that excite the imagination are always keenly read. An incident that carried a wealth of human interest was that simple service on Remembrance Day at the village of Frank. An aged couple, the husband himself a war veteran, probably for the first time since he Great War ended, received a tribute of honor justly due from their fellow men and women. They wore medals of three sons killed in the Empire's service. "That was indeed," remarked a visitor to the father. "It was," replied he, and was silent. Doubtless a long train of thought was conjured up as he thought of the years. And following the sounding of "Last Post," which brought lumps in the throats of the onlookers as they beheld the brave little woman beside her husband on the improvised platform, he pulled up the Union Jack from half-mast to its full height, while the glorious notes of "Reveille" burst forth, recalling the old barrack room words that accompanied the first few notes of "Rise, Soldiers, Rise!" All to this faithful old couple, and to Bob Mundy, relief camp boss, whose kindly thoughts for these people on the anniversary of the Armistice resulted in a fitting tribute of honor being paid to them and their glorious lead.

Exhibitions of the noble art of boxing in Coleman, however, find they may have been as real honest-to-goodness fights, have been a "hops" financially. Good scrappers have come from far and near; they have been cheered, and the very slim pickings, while the promoters often pay big expenses incidental to staging boxing shows, have been empty bags. It is not likely that the squared ring will be erected again till more support is assured, for promoters get tired of doing these things just for fun. They expect a little for the work and risk they run of paying deficits.

Free publicity never made a newspaper rich or paid the wages of its employees.

There was a large number of dancers at the social at the Polish hall on Monday evening.

Mr. Jack Wilson spent the week-end at Pincher Creek.

Mr. O. E. S. Whiteside returned yesterday from three weeks visit in eastern Canada.

Jack Williamson of Pincher Creek was the guest of "Sonny" Richards over the week-end.

The Girl Guides plan on holding a social to which mothers of the Guides will be invited.

Victoria Rebekah lodge held a district meeting here on Tuesday evening, which was largely attended.

Mrs. Norman McAuley of Star Creek ranch entertained a number of ladies at her home on Tuesday afternoon.

Miss Yuill and Miss Hayson gave talks at the teachers' convention and Mrs. Clifford presided over a section of the meeting. All public school teachers attended and Principal Hoyle represented the high school.

Minerva Chapter O.E.S. held a special meeting last Thursday in which the offices were filled by worthy matrons of the order from Crows Nest Pass towns.

A very enjoyable social hour was spent following the meeting.

British Aviator Has Amazing Escape When Forced To Jump In Spinning Research Trials

Flight Lieut. C. S. Staniland, test pilot and racing motor car driver, had an amazing escape from death when he was making special research spinning trials with a secret type of aeroplane near Coblenz, Middlesex, recently. Spinning trials form part of the routine work in the testing of new British aeroplanes, and these trials are first done by the manufacturers and are repeated by the official test pilots of the air ministry's experimental stations.

Often considerable risks must be taken by these pilots when some novel feature is being tried out, or, as in this instance, special research work is being done; but they develop special facilities for dealing with emergencies. It is doubtful if, in the whole history of flying any test pilot has had such an anxious moment as Flight Lieut. Staniland.

He was performing special research spinning trials at about 7,000 feet when a flat spin developed with high rate of rotation. For some time he endeavored to extricate the machine but without success. Finally he decided the time had come when he must jump with his parachute. The aeroplane was spinning to the right and he decided to jump over the left side of the fuselage in order to fall clear of the machine.

Owing to the direction and speed of rotation of the aeroplane, however, Flight Lieut. Staniland was immediately hurled back into the rear cockpit of the machine. Fortunately he had not begun to pull the rip cord of his parachute, so that the canopy was still in the pack. The rear cockpit of this particular machine is deep and he found difficulty in getting up onto his feet as a result of the high centrifugal loads. But eventually he struggled to his feet and climbed out of the machine for the second time.

Through all these experiences he remained perfectly cool and was able to guess the cause of his being thrown back into the machine. He reasoned he must jump this time over the other side and this he succeeded in doing, the machine still spinning flat and rapidly. He fell clear but waited to ensure there was no risk of his parachute fouling the aeroplane. The aeroplane passed within a few feet of him as he fell and pulled the rip cord. Immediately afterwards he saw the machine only a few feet below him. While he had been spinning at the aeroplane must have passed behind him, falling at a higher speed than he had thought. He landed safely near Coblenz and his aeroplane crashed in a disused gravel pit about two miles away.

Flight Lieut. Staniland is a pilot with a remarkable record. He has won many events, both on road and track, and recently during the Ulster T.T. motor car race he set up new class lap records in a six-cylinder car. In 1928 he was selected to be a member of the British Schneider trophy team. His skill at aerobatics is universally acknowledged.

Home Of Poet Restored

Philadelphia, Home Of Edgar Allan Poe Now Public Shrine

Restored in every detail to its appearance of a century ago, the Philadelphia home of Edgar Allan Poe has been opened as a public shrine.

It was here that he wrote the poem, "The Raven," and many stories, including "The Gold Bug." Many original manuscripts, first editions and other valuable pieces from collections of Poe's works now are on display in the restored, three-story cottage.

Included among the original articles are a stove, a desk and bedroom furniture. A bust of Falstaff has been placed in the study in which Poe worked.

A Great Responsibility

A motorist in Hull, Que., was held on a charge of manslaughter arising out of an automobile accident in which a car he was driving collided with a truck killing a friend who was riding with him as a passenger. This provides another argument against the practice of giving a lift to pedestrians on the highway. Very few motorists realize the responsibilities they accept when they take their places behind the wheel of a car.

Mrs. Peck: "She's very pretty, but she never says a word. I can't imagine why all the men speak so highly of her."

Mr. Peck: "I can."

The sit in New York City is cleanest in April and last month was dirt in December.

How He Understood It

Small Boy Slightly Mixed On Name Of Bird

A little boy who applied for registration at the Griffinton club, one of the Federated Charities of Montreal, evidently thought the Recording Angel must be a woman.

Finishing the registration book missing, the lady who took his name asked the lad if he would run upstairs and get it from Miss Mackay. Up he scampered, and, knocking at the open door of the lady superintendent's sanctum, said breathlessly: "Mrs. Sayers says will you please give me the— the Resurrection Book?"

Avoid Hunting Accidents

In deer hunting season in Missouri's rugged Ozarks a hunter without a red hat isn't well dressed. A red hat—or at least red feathers in a hat that isn't red—is supposed to be the signal to other hunters that the wearer is a deer. Not a single fatality was reported last year and red hats and red feathers were given much of the credit.

Black diamonds, or carbons, are found mainly in Brazil in river or stream washings and are the rarest and highest priced of all industrial diamonds.

More than half the money spent for amusement in Paris last year was for movie admissions.

Unnecessary Accidents

Mechanical Condition Of Many Cars Causes To Safety

Justice Kelly, speaking in the supreme court at Whitby, Ontario, uttered a great truth when he stated that many automobile accidents were caused by people driving cars which had long since qualified for the junk pile. His observations were made from his experience of court cases arising out of such accidents, and they will be supported by many who have been victims of accidents because of inferior, and sometimes uncontrollable cars, being driven on the highways.

This condition is, perhaps, more apparent at the present time than it has been in past years. Cars are being driven on the highways today which, in more prosperous years, would have long before been consigned to the scrap heap, unfit for further use. The question is, then, the reason why human lives should be endangered. No car should be allowed to travel on a highway unless its mechanical condition is such as to keep it well within control, to make a safe vehicle to drive.

Both pedestrians and motorists whose cars are in safe condition have a right to such protection, and if there is no law which can keep unsafe cars off the roads then it is time one was enacted.—Oshawa Times.

Richest City In World

Johannesburg, South Africa, Enjoys Continuous And Amazing Prosperity

The world's richest city today is not London or New York. It is Johannesburg.

This fact emerges from the comments that have followed a reference made by Samuel Storey, M.P., for Sunderland, to the amazing prosperity of the city which is the creation of one Transvaal gold.

At the peak of this year's boom on the Johannesburg Stock Exchange, gold mining shares

rose to the fantastic total of three hundred million pounds. Not financiers and business men only, but miners, school teachers, office clerks, and laborers seized the golden opportunity of quickly rising prices, and, having successfully speculated, they proceeded to enjoy their good fortune by spending it. They take no thought for the morrow.

In Johannesburg the morrow has always been left to take care of itself.

As evidence that it does so, every one points to the progress of the city, which has been continuous.

Premier R. B. Bennett, shortly before the close of the last session, announced the government did not consider itself bound by the Nickle anti-tin motion passed in 1919.

Safety In The Home

Commonsense Rules Given By Health Officer Of New York

New York's health commissioner has prepared a "home safety code for adults" containing a list of injunctions. Some of these are:

Keep every room and all stairs well lighted.

Keep floors clear of grease, toys, etc., and the stairs free of all encumbrances.

Use a rubber bath mat in the bathroom.

Use a step-ladder when working above the floor.

Use non-inflammable cleaning fluids.

Keep wet hands off electrical appliances.

Read the label before taking any medicine.

Use commonsense, do not rush, be careful.

These are all rules of elementary commonsense. But it is just by the simple neglect of ordinary precautions that accidents occur in homes.

Have No "Unwritten Law"

British Countries Do Not Recognize It States Judge

Canada is told officially it has no "written law." Judge Joseph Wearing, man in a London (Ont.) court for using a knife upon an offender against his wife. "In the United States," says the magistrate, "judges and juries have a written law which holds that fathers and husbands may on occasion take the law into their own hands, but never in British countries."

The weakness of the unwritten law is shown in its very name; if it were on the American statute books it would be disqualified in a day.—Christian Science Monitor.

Discussion For Next Session

Federal House To Debate On Question Of Titles For Canadians

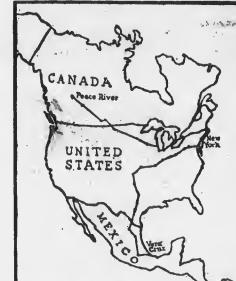

Whether Canadians should be allowed to accept titles from the king will be discussed by parliament when it opens next January. Humphrey Mitchell, Labor member for Hamilton East, is expected to start a full-fledged debate by introducing a resolution to continue the titles-ban with the exception of judges, military and naval officers.

Premier R. B. Bennett, shortly before the close of the last session, announced the government did not consider itself bound by the Nickle anti-tin motion passed in 1919.

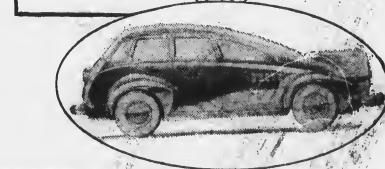

Under Three Flags Expedition

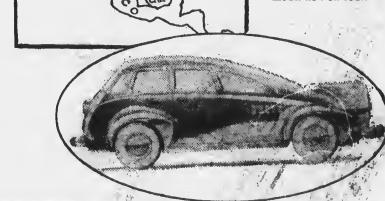

Travelling from Canada to Mexico with many stops in Canada and the United States. Over a dozen cars make up the caravan. (Above) A streamlined car which takes the lead.

At left: Map of the route the expedition will travel from Peace River, Canada, through the United States to Vera Cruz, Mexico, this month.

(Below) Engineers' design for a 1934 streamlined car which is even nearer to the ground than the Three Flags Expedition model now on tour.

Travelling at high speeds, an automobile of older design uses approximately 80% of its gasoline consumption just to overcome wind resistance. Streamlining reduces this resistance greatly, hence makes power economies. It also greatly enhances riding comfort, and a fair amount of streamlining adds to the general car length; cars will grow broader in front and taper to the rear, which is just the reverse of the old carriage design.

Lancashire Woman Who Claims Relationship With Edison Has Some Remarkable Inventions

Earth's Last Blind Spot

Admiral Byrd Seeking To Throw Light On Antarctica

Admiral Byrd is off. It is a long way to Antarctica, but Byrd is blithely beginning what is, to him, something of a homing flight. The man who established "Little America" and lived there as long as Byrd did cannot but feel that he is setting forth for a strange land. Yet, it is a fact that the land toward which the admiral is voyaging is the blindest of all the blind spots of the earth's surface. It is, in truth, the only really blind spot left.

Surely there has never been another explorer who has made his work so interesting to so many. He is the first man to render Antarctic exploration a matter of common knowledge and a topic of household conversation. He is the first explorer whose expedition, even before its starting, has been celebrated by a special postage stamp of the United States.

There is enough romance in this journey southward to the earth's most hostile limit, but there is more than romance. Antarctica is a mass of land comparable in area to the habitable continents. It is, therefore, vastly more important as a field for scientific exploration than the north polar regions, which are all water. Human beings can live on a frozen sea or derive much benefit from it, but with the world's population ceaselessly increasing man cannot concede that any land is beyond his attainment. Not, probably, as a place of permanent human abode, but as a source of some of the mineral necessities of civilized life the great continent beyond the southern oceans may some day be as well known and accurately mapped as the State of Rhode Island.—Cleveland Plain Dealer.

The Empire State Building

Thousands Have Viewed New York From Observation Tower

The first week the Empire State Building observation tower opened 31,000 people poured upward to see the view. Six months later attendance during the Christmas week had fallen off to 23,000. And in a recent week only 5,685 leaned over the ramparts of the highest building in the world and cheered "Ooooh!"

A few weeks ago a register was started up in the observatory and the results have been gratifying. Previously they thought the crowds had been too great. From a registration totaling about one-third of the total attendance it was learned that visitors came in one week from forty-six States and forty-five countries. Only one in ten came from New York City, sad but true.

On the other hand two people John Stephens of Mudros and Paulin Masterson of Libau, Latvia, came from places that Empire State Building executives had never heard of. They looked on their maps and sat nonplussed. They called up the National Geographic Society and learned that Mudros is on the island of Lemnos in the Aegean and that Libau is now called Liepaja and has 60,000 inhabitants. Quite educational.—New York Evening Post.

An Unusual Operation

Patient With Cancer Had Eaten Lung Successfully Removed

A report on the successful removal of an entire lung from a patient by Dr. Everts A. Graham was made public by Dr. Morris Fishbein, director of the Journal of the American Medical Association.

In an article appearing in the journal Dr. Graham and Dr. J. S. Singer both of the Washington University School of Medicine at St. Louis, state: "It is apparently the first time in which the whole lung has been deliberately removed at one stage."

Cancer necessitates removal of the lung. The operation was performed last April 5, but no previous reports had been made public. The patient, a Pittsburgh physician, is reported fully recovered.

Dr. Singer had charge of the diagnostic end of the case.

Misses Lost Pounds

"Aunt Mamie" Williams, Negro, who once tipped the scales at 788 pounds, has complained to the Sheriff's office at Jacksonville, Florida, that troublesome neighbors have caused her to lose 200 pounds. "They have made her feel 'poorly,'" she said, and she wants peace and quiet restored so that the lost pounds may be regained. She is forty-eight and works the garden in which much of her food is raised.

Following in the footsteps of Edison, the world-famous inventor, whom she claims as a remote relative, a Lancashire woman has had a number of remarkable inventions.

Under her maiden name of Nell Bradshaw she has patented some extraordinary devices.

In the drawing-room of her home at Heaton Chapel, near Manchester, Miss Bradshaw has her newest inventions set out on the carpet, and even on the piano stool.

Her four latest and most important inventions are a lamp for penetrating fog at sea or on land; an improved robot signaling apparatus; an anti-drowning life-jacket; and a thief alarm for unattended motor cars.

With the curtains of the drawing-room closed, Miss Bradshaw demonstrated the capabilities of her lamp for penetrating fog or darkness.

The lamp was built externally of copper, and with a series of lenses inside the "bulb's eye."

Miss Bradshaw switched on the light and directed it to the farthest corner of the room.

So powerful was the effect that a pin head on the wall could be seen quite plainly at a distance of 15 feet.

The light itself was amber, and the current was taken from one of the ordinary wall sockets.

"By using a more powerful lamp at sea," declared Miss Bradshaw, "it would be possible to dispel fog for a distance of at least five ship-lengths away."

"That distance could be increased by building the entire lamp on a larger scale still."

"It has been tested on the road by the Stockport police and two of the principal bus companies operating in the North, and now the Ministry of Transport has taken an interest in it."

Miss Bradshaw then showed her life-jacket, which is made of rubber and is fitted with four pockets.

It is intended for use by life-guards at seaside places, and by shipwrecked seamen and airmen, who are forced to come down on the water.

By inflating a tube attached to the jacket it is always ready for an emergency.

It is worn like a short water-proof, but as soon as the wearer gets into the water the lower edges spread out on the surface like a circular lifebelt.

This keeps the upper part of the water erect and clear of the water entirely, and Miss Bradshaw claims that a non-swimmer could paddle about the water for days if necessary.

One of the pockets is fitted with a "baby" wireless transmitting set so that an S.O.S. can be sent out.

Another pocket contains a compass, a thimble, a revolver, and the fourth pocket is packed with foodstuffs.

Miss Bradshaw further claims that she invented 12 years ago a similar system of robot street signals to that which is in use today.

"I was born in New York," she explained, "but came to England when I was quite young."

"I have always been interested in the question of life-saving, whether ashore or afloat, and nearly all my ideas have that object behind them. Financial gain never concerns me."

"According to the family history, I am remotely related, on my grandmother's side, to Edison."

Cost Of Armaments

Two Nations Spending Millions With Huge Budget Deficit

A Tokyo cable to the New York Times tells that Japan faces a budget deficit in the coming year of \$270,000,000. Yet Japan will spend on her army and navy next year \$351,000,000. Civilization truly is a bafing thing.—Ottawa Journal.

And the country where the New York Times is published has budgeted for a deficit of \$307,000,000 in 1934 and navy and army expenditures (exclusive of non-military items) of \$358,000,000.—Toronto Star.

Honor Goes To Prussia

The world's oldest flea has been discovered at Palenicek, East Prussia. The venerable insect is 5,000 years old, according to scientific examination, and is housed in a piece of amber, found recently, on the Biltmore.

Much More Important

Hillier boasts that he does not drink or smoke. But, says the Biltmore Recorder and Times, he hasn't said a word about the commandment, "Thou shalt not kill."

Boxing matches are popular in Paris.

WORLD HAPPENINGS BRIEFLY TOLD

Big navy propagandists warned Japan against interpreting the American fleet's removal from the Pacific as a goodwill gesture.

A thousand men will be stationed this winter in single-jointed camps in Prince Albert National Park, it was stated by J. A. Wood, superintendent.

William F. (Caribou Bill) Cooper, 61, who carried the mail in Alaska for 30 years, died recently in Tacoma, Wash., at a sanatorium. He was a friend of Jack London.

King Victor Emmanuel made Premier Benito Mussolini minister of both the navy and the air after accepting the resignations of Air Marshal Italo Balbo and Admiral Giuseppe Sirimanni.

The London Daily Express said an all-empire shipping conference would be held in London early next year to preserve empire cargoes for empire ships.

Fishermen of Palermo, Sicily, reported that they have located the skeleton of the French dirigible Diamant which disappeared on a flight to Africa in December, 1923, with 52 men aboard.

Under plans approved recently by Hon. Thomas Murphy, Federal Minister of Interior, a road is being started on the Jasper Highway, west of the town of Jasper, over the 17-mile stretch to the British Columbia border.

A 20-year-old apple tree is bearing seedless and coreless fruit on the farm of Dr. Percy Fulksen, near St. Joseph, Missouri. Never before has any tree in the orchard produced such fruit. The apples resemble the Jonathan variety.

If long-term credits are arranged, the absorbing capacity of the Soviet Union not only for American machinery and tools but also for general consumers' goods are unlimited, Louis Kon, former trade commissioner in Canada for Soviet Russia, declared in a recent speech at Montreal.

Letter Sorters Are Clever

Halifax Postal Employees Delivered Letter Addressed In Figures

Letter sorters in the post-office don't invite people to address letters in code, but they made it known they could understand some of them.

One envelope arrived at Halifax, Nova Scotia, with a series of numbers but not a letter written on it. This took a little thought for the boys who toss around letters like a "hustler" does handbills. But the letter finally was delivered to a soldier in Wellington barracks.

Each figure represented the corresponding numerical position in the alphabet they discovered.

Needle Experts Higher

In the first six months of the current fiscal year Canadian exports of partially manufactured nickel increased 450 per cent. over those for the corresponding six months of 1932. For the first half of the last fiscal year nickel exports amounted to value of \$2,968,120, while for the same period this year the exports were valued at \$13,473,280.

An electric light bulb from Ada, Ohio, which has been in constant use for 30 years, is on display at the World's Fair at Chicago. The bulb was purchased by W. H. Freud at the St. Louis exposition in 1903.

Nearly half of England's 44,500,000 people are smokers.

Have You Pimples or Boils?

Mrs. T. A. Berney of 175 W. 11th Street, St. Louis, Mo., has had a bad case of boils and acne. The condition of my blood, I certainly was in need of it over my face. I took Dr. Pierce's Golden Medical Pimple and Boil Remedy. I had no return of these eruptions. Sold by druggists everywhere. Write Dr. Pierce's Clinic, Buffalo, N. Y.

W. N. U. 2020

Water Buses On Thames

Passenger Traffic Is Planned For London's Water Highway

London's broadest highway, which has been practically neglected for 20 years or more, so far as passenger traffic is concerned, is likely, before long, to come again into use. Private enterprise will probably soon provide a service of "water buses" on the Thames. Arrangements are afoot for the establishment of a service of vessels to call at the long-neglected piers which used to be served by the "penny steamers."

All the boats will be capable of a speed of miles an hour. Express steamship boats will take about 33 minutes between Hammersmith and London Bridge.

During the years 1905-1908 the London County Council ran a service of passenger boats on the Thames, which was eventually stopped because it did not pay.

It is believed that with the increased passenger loads of today, and faster, more economical and weatherproof boats, such a scheme will now be a success.

Ireland Investigating Automobile Accidents

Despotic Every Effort Number Has Not Decreased

That the government appoints a committee to investigate the large number of automobile accidents in Northern Ireland has been asked by the Ulster Automobile Club. The request was made following a meeting in Belfast at which it was shown that the automobile claimed at least 20 lives a day in Northern Ireland, and that, despite present efforts of the government, the number of road accidents has shown no decrease.

There followed the rule of the Emperor Paul, who played safe conservatism until Russia got rid of him by strangling him—the greatest disaster for elections. His successor, Alexander I, did not quite see why he should recognize a distant country across the sea, but as time went on and the two nations were doing it, and the thing became expedient from a trade standpoint, he consented to the risk.

Now, after more than a century, it is the United States which is debating whether it should recognize Russia—and for the same reasons. It is a curious prank of history.—Ottawa Journal.

A Few Sips—A Few Cents Coughs, Colds Gone

BUCKLEY'S MIXTURE is not a cheap potion, but it takes so little of it to cure a cold that it costs less than any other preparation.

Buckley's is an amazingly good medicine for colds, coughs, sore throat, and to stop your cough or cold entirely. Good-bye to the colds and coughs of winter. Take Buckley's. It means *say, now, instant relief from cough, colds, sore throat, etc.* Play safe. Refuse substitutes. Buckley's is sold everywhere.

History Repeats Itself

This Time United States And Russia Change Places

Apropos of President Roosevelt's gesture of recognition toward the Soviet Socialist Republic, a gesture that has been withheld for some fifteen years, it is interesting to recall that it took Russia thirty-three years to recognize the infant Republic of the United States. The great Empress Catherine thought the American Republic an infamy—a people who dared challenge the divine right of emperors; who separated the Church from the State, and who had the insolence to declare that all men were born free and equal. To her Imperial Highness, this was anachrony.

There followed the rule of the Emperor Paul, who played safe conservatism until Russia got rid of him by strangling him—the greatest disaster for elections. His successor, Alexander I, did not quite see why he should recognize a distant country across the sea, but as time went on and the two nations were doing it, and the thing became expedient from a trade standpoint, he consented to the risk.

Now, after more than a century, it is the United States which is debating whether it should recognize Russia—and for the same reasons. It is a curious prank of history.—Ottawa Journal.

Helen E. Kimball's Recipes

New Cake Frostings By Director, Food Service Department Borden Company, Toronto

CRUNCHY CARAMEL FROSTING

One cup sweetened condensed milk (caramelized); 1/2 teaspoon lemon extract; 2 cups rice flakes.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy. Add lemon extract and one cup rice flakes. Mix thoroughly. Sprinkle on cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (450 degrees Fahrenheit) 10 minutes.

MARSHMALLOW CARAMEL FROSTING

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy. Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

CHOCOLATE-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut.

Beat caramelized sweetened condensed milk (see directions for caramelizing) until smooth and creamy.

Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Frost with whipped cream, filled generously with remaining rice flakes. Bake in a hot oven (400 degrees Fahrenheit) 10 minutes.

COCONUT-SWEETENED CONDENSED MILK

Remembrance Day Service Draws Many to United Church

Rev. Roy Taylor Exhorts Congregation to Turn Towards New Day

The United church was filled to capacity Sunday evening when an impressive Remembrance Day service was conducted by Rev. Roy C. Taylor, B.A., B.D. Hymns of national and international content were heartily sung and Mr. B. Skinner sang in pleasing style a tenor solo in keeping with the occasion.

Mr. Taylor's sermon was based on the 13th chapter of John in which he stated: "Peace was the central theme of Jesus' address to his disciples in his valedictory in the Upper Room. It was also the first word he uttered on Resurrection morning, and no sweet word can be found in the human vocabulary. It is like the first glimpse of the homeland to a mariner who has long roamed strange seas, the word is worn with the labors of the ocean."

Fifteen years ago we brought ourselves to the point of thinking we were engaged in righteous cause, but after the tumult and shattering of died, doubts had arisen about the righteousness of the war. Now the pendulum is swinging to the other extreme and we are in superlatives of contempt adequate to express the hatred of war and its attendant miseries. While we brand war as a monumental crime, let us be careful lest in our enthusiasm for peace we dismisse ourselves by forgetting the health, the courage, the sacrifice of our patriot dead, and the maimed and broken lives of the veterans still alive. More will die in the name of the law of the jungle, to treat others as they treat you spirit, and the weak are still exploited by the strong.

Let us gird ourselves against war and we will find that day when such shall be but the memory of a horrid night. We have sung about peace; let us mobilize for peace. The world is weary of Christian platitudes and world hunger for reality, and the Church must do more than sing carols announcing the birth of the Prince of Peace.

Bernard Shaw says: "The trouble with the world is that it has never had a really good fight."

The church cannot preach one thing and practice another. It is under fire today as to whether it is an effective agency in the life of the community. The League of Nations is the best machinery for international co-operation and we should support our government in fulfilling its obligations under the covenant.

The war that lifts and helps us to its colors, God is waiting to work his purpose through the churches. Let us turn our faces towards the light of a new day to come under our great leader until we have won the day for God and humanity.

Keenly Contested Fight

(Continued from Page One) Quincey rules. It was a surprise to a large number of the fans when referee Jimmy Burrill awarded the match to Winters on points.

In the preliminaries Jimmy Lecom, 110 lbs., of Maplewood and David Reed, 120 lbs., of Hillcrest, fought three rounds. Reedie was awarded the victory on points.

Andy Clegg of Coleman and Young Davis of Hillcrest fought three rounds to a draw. Clegg put on a good showing against his heavier opponent, who had a longer reach. As a

Curtain raiser, Coccione and D'Apollonia, two local novices, fought two rounds to a draw.

Jimmy Stammor of Lethbridge appeared on the ring and challenged the winner of the Stuart-Morrison bout. Jimmy Burrell also issued a challenge.

Frank Barringham, promoter, announced the bout. At first, the bout was not as well as at previous matches, though a good card was presented by supporters of the rival boxers.

BUSINESS BOOSTERS

The Red Deer Advocate states: "Last Saturday was the biggest and best business day in the history of Red Deer. There were more goods sold and money taken than on any other day before. Records were smashed in all directions."

Full pages of advertising by local stores accomplished this desirable and satisfying result. Two stores carried four pages of wide open carried liberal space. Red Deer is a comparatively short distance from Edmonton.

Radio

Model K-106

Here is General Electric's outstanding 1933 radio. A ten-tube superheterodyne which embodies for the first time tone color and double action tone control - color radio volume control - color radio noise suppressor - and visual tuning. A receiver with truer, finer, more realistic tone. The rich walnut cabinet is of Renaissance origin, beautiful and dignified with side panels of figured walnut, hand-rubbed giving a permanent finish.

Model K-106 employs the following General Electric Radiotrons - four GE-58's, three GE-56's, two GE-2A5's, one GE-80.
